PROFILE SUMMARY

Motivated IT Undergraduate at the University of Kelaniya with a strong interest in full-stack software engineering. Experienced in designing and developing scalable and secure web and mobile applications using modern technologies.
Solid understanding of object-oriented programming, RESTful APIs, database design, and the software development lifecycle, including analysis, testing, and debugging. Passionate about writing clean, efficient, and maintainable code while continuously learning new frameworks and best practices in collaborative team environments.

EDUCATION

BSc (Hons) in Information Technology *2024 - Present*

- University of Kelaniya

Comprehensive Master Java Developer Diploma *2023 - 2024*

- IJSE-Institute of Software Engineering

G.C.E. Advanced Level - Physical Science Stream (2022) *2020 - 2022*

- H/Ruhunu Vijayaba College

PROJECTS

QuizHub - Distributed Quiz System (Group Project) *React.js | Tailwind CSS | Node.js | Express.js | JWT | MongoDB*

- Developed a distributed quiz platform allowing teachers to create and manage quizzes while students join and participate in real-time, with secure JWT authentication.
- Designed and developed RESTful APIs using Node.js and Express, implemented JWT-based authentication, and ensured scalable and efficient backend architecture with MongoDB.
- Implemented teacher & student modules, real-time result updates, and a responsive React/Tailwind UI for smooth multi-user interaction.

Point of Sales System - Full-Stack Web Application *Java | Spring Boot | React | MySQL*

(Project Frontend | Project Backend)

- Built a full-stack web application to manage sales, inventory, and customers, using Spring Boot APIs, MySQL database, and a responsive React frontend.
- Implemented real-time inventory tracking, sales processing, and customer management with CRUD operations, validation, and dynamic dashboards.

Plantation Task Management System (Ongoing) *React.js | Express.js | Node.js | MySQL | JWT*

- Designing and developing a centralized web platform to manage plantation tasks, workforce allocation, and harvest tracking across multiple crop fields.
- Building RESTful APIs using Node.js and Express, implementing secure JWT-based authentication and role-based access control.
- Designing and optimizing the MySQL database schema to support efficient data storage, reporting, and real-time operational monitoring.
- Performing API testing and debugging using Postman while following clean coding practices and Agile development methodologies.

HerLife - Breast Cancer Awareness Mobile Application *Flutter | Firebase | Google Gemini API | Google Maps API*

- Built a cross-platform mobile app with step-by-step self-check tutorials, reminders, doctor connections, and support in multiple languages to raise breast cancer awareness in Sri Lanka.
- Added an AI symptom checker, location-based clinic finder, and secure Firebase backend for personalized guidance and safe data storage.
- Awarded Winner at SDG Sprints Hackathon and 2nd Runners-Up at Code with WIE Hackathon.

SafeStep - AI-Powered Personal Safety Mobile Application *Flutter | Firebase | MSpace API | Google Maps API*

(View Project)

- Developed a cross-platform personal safety app with SOS alerts, live/offline location sharing, and unsafe area notifications.
- Integrated AI-based motion and route detection with chatbot support and family alert features.
- Built a secure, privacy-focused backend with real-time notifications using Mobitel mSpace APIs.

Cakely - Cake Ordering Website *React.js \ MongoDB | Express | Node.js | JWT | CSS/Bootstrap | Swagger*

(Project Frontend | Project Backend)

- Built a full-stack e-commerce website using the MERN stack with login, product browsing, and cart.
- Developed secure authentication using JWT and password hashing.
- Deployed frontend on Vercel, making the website accessible online with a responsive and user-friendly interface.

Food Delivery Web Application (Project) *React JS | Vite | JavaScript | CSS*

- Built a web app for food ordering and order tracking.
- Designed responsive user interface for smooth user experience.

Car Rental System (Project) *Java Swing | MySQL | NetBeans*

- Developed a desktop app for vehicle rental and customer management using layered architecture.
- Integrated MySQL database for storing rental and vehicle records.

Grain Store Management System (Group Project) *Java Swing | MySQL | NetBeans*

- Developed a Java-based application for grain storage, inventory tracking, and buyer management.
- Connected application with database to handle stock updates and transactions.

TECHNICAL SKILLS

Programming Languages : Java, Python, Javascript/Typescript, Dart, C++, SQL
Frontend : Flutter, React, Next.js, Tailwind CSS, HTML, CSS
Backend : Java (Spring boot), Node.js, Express.js, Rest API
Databases : Firebase, MySQL, postgreSQL, MongoDB
Tools : Git/Github, Postman, Figma, VS Code
Concepts : OOP, Agile/Scrum, DSA, ML, UI/UX

CERTIFICATIONS

Data Science,Machine Learning,DL,NLP Bootcamp Certificate Course (Ongoing)
Comprehensive Master Java Developer Certificate - IJSE-Institute of Software Engineering (View Certificate)

ACHIEVEMENTS

Winner - SDG Sprints - IEEE Sri Lanka Section SIGHT
2nd Runners Up - Code with WIE 2025 - IEEE WIE Sri Lanka Section
Finalists - SLT Mobitel Codeblast 2.0
Top 10 Selected - KelaniXtreme - IEEE Student Branch University of Kelaniya
Top 10 Finalists - Junior Hack 7.0 - Software Engineering Students' Association in University of Kelaniya
