

THASUNI INDUMA

Software Engineer Intern | IT Undergraduate | Full-Stack Developer

+94 76 341 6082 | thasuniinduma@gmail.com | Colombo, Sri Lanka

www.linkedin.com/in/thasuni-induma | thasuniinduma.me | <https://github.com/ThasuniInduma>

PROFILE

Motivated IT undergraduate at the University of Kelaniya with hands-on experience in full-stack software development using Java, Spring Boot, React, Node.js, Flutter, and cloud technologies. Strong foundation in OOP, REST APIs, SQL/NoSQL databases, and software engineering principles. Passionate about building scalable applications, learning technologies, and collaborating within agile development teams to deliver high-quality software solutions.

EDUCATION

BSc (Hons) in Information Technology

2024 - Present

- University of Kelaniya
- Current GPA - 3.5

Comprehensive Master Java Developer Diploma

2023 - 2024

- IJSE-Institute of Software Engineering
- Completed an intensive industry-oriented program covering Java, Spring Boot, React, Hibernate, JDBC, REST APIs, JWT Security, Data Structures & Algorithms, Design Patterns, and software architecture, while developing multiple full-stack applications following industry best practices.

G.C.E. Advanced Level - Physical Science Stream (2022)

2020 - 2022

- H/Ruhunu Vijayaba College

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, Dart, C++

Frontend: React.js, Next.js, Tailwind CSS, Flutter

Backend: Spring Boot, Node.js, Express.js, RESTful APIs, JWT, Hibernate ORM, JDBC, Microservices Architecture

Databases: MySQL, MongoDB, Firebase, PostgreSQL

Cloud & DevOps Tools: Git, GitHub, Postman, Docker, CI/CD (GitHub Actions), n8n, Vercel, Firebase, Azure

Concepts & Methodologies: OOP, SOLID Principles, REST APIs, DSA, Agile/Scrum, SDLC, RBAC, UI/UX

PROJECTS

E-Commerce Microservices Backend System

Technologies: Java, Spring Boot, PostgreSQL, RabbitMQ, Docker, CI/CD(GitHub Actions), SonarCloud, Azure

- Designed and built a 3-service microservice architecture (Product, Order, Notification) with independent databases and event-driven communication via RabbitMQ.
- Developed RESTful APIs using Spring Boot, Spring Data JPA, and Hibernate with proper exception handling.
- Set up CI/CD pipelines using GitHub Actions with automated build/test stages, integrated SonarCloud for static code analysis, and resolved security and build issues identified during scans.
- Containerized services with Docker, published images to Docker Hub, and configured PostgreSQL on Azure.

Plantation Task Management System ([View Project](#))

Technologies: React.js, Express.js, Node.js, MySQL, JWT, RESTful APIs, Azure VM

- Developed a role-based full-stack platform supporting Admin, Supervisor, and Worker workflows.
- Designed secure RESTful APIs with JWT authentication and Role-Based Access Control (RBAC).

- Built optimized MySQL database for task management, workforce monitoring, attendance, and reporting.
- Deployed and managed the production application on Microsoft Azure Ubuntu VM and Linux services.

Point of Sales System - Full-Stack Web Application ([Frontend](#) | [Backend](#))

Technologies: Java, Spring Boot, React.js, MySQL, Spring Security, JWT, Bootstrap

- Developed a layered full-stack application for inventory, sales, and customer management.
- Designed RESTful APIs with Spring Data JPA and MySQL for efficient data persistence.
- Secured backend services with Spring Security and stateless JWT-based authentication.
- Applied object-oriented principles and responsive UI to deliver a maintainable and scalable system.

QuizHub - Distributed Quiz System ([View Project](#))

Technologies: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, RESTful APIs

- Implemented a distributed backend architecture with a custom API Gateway and round-robin load balancing across multiple service instances.
- Developed secure stateless APIs with JWT-based authentication and role-based authorization.
- Integrated MongoDB Atlas and built scalable backend services for reliable cloud-based data management.
- Built responsive React interfaces and real-time quiz workflows with automated scoring and result updates.

HerLife - Breast Cancer Awareness Mobile Application

Technologies: Flutter, Firebase, Google Gemini API, Google Maps API

- Developed a cross-platform healthcare application using Flutter and Firebase.
- Integrated Google Maps API and cloud backend services to support location-based healthcare accessibility.
- Developed an AI-powered chatbot using Google Gemini API to provide guidance and educational content.

CERTIFICATIONS

Master Data Science, Machine Learning, Deep Learning, NLP & Generative AI (*In Progress*)

- Covers Data Science, Machine Learning, Deep Learning, Natural Language Processing, Generative AI, Python, Statistics, Mathematics, and End-to-End Industry Projects.

ACHIEVEMENTS

Winner - SDG Sprints - IEEE Sri Lanka Section SIGHT

2nd Runner-Up - Code with WIE 2025 - IEEE WIE Sri Lanka Section

Finalist - SLT Mobitel Codeblast 2.0

Finalist - Hack Like a Girl 3.0 - SLASSCOM

VOLUNTEERING

Member of Industrial Management Science Student Association, University of Kelaniya (2024 - Present)

- Contributed to organizing HackX, HackX Jr, and Exposition events. Served on the Designers Panel for Exposition Magazine Issue 21, enhancing teamwork and event coordination skills.

Student Volunteer, IEEE Student Branch University of Kelaniya (2025 - Present)
