

Thasuni Induma

Software Engineer Intern

Phone: +94763416082 | Email: thasuniinduma@gmail.com | Address: Beliatta, Sri Lanka
LinkedIn: <https://www.linkedin.com/in/thasuni-induma> | Portfolio: <https://thasuniinduma.me> | GitHub: [GitHub](#)

Profile

Motivated Information Technology undergraduate at the University of Kelaniya with hands-on experience in full-stack web and mobile application development. Skilled in Java, Spring Boot, React, Node.js, Flutter, and cloud-based technologies, with a proven track record of building scalable, user-centric software solutions. Award-winning hackathon participant with experience delivering AI-powered and real-world applications from concept to deployment. Passionate about software engineering, emerging technologies, and creating innovative solutions that drive meaningful impact.

Education

BSc (Hons) in Information Technology	2024 - Present
- University of Kelaniya - Current GPA - 3.5	
Comprehensive Master Java Developer Diploma	2023 - 2024
IJSE-Institute of Software Engineering	
G.C.E. Advanced Level - Physical Science Stream (2022)	2020 - 2022
H/Ruhunu Vijayaba College	

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, Dart, C++

Frontend: React.js, Next.js, Tailwind CSS, Flutter

Backend: Spring Boot, Node.js, Express.js, RESTful APIs, JWT, Microservices Architecture

Databases: MySQL, MongoDB, Firebase, PostgreSQL

Cloud & DevOps Tools: Git, GitHub, Postman, Docker, CI/CD (GitHub Actions), n8n, Vercel, Firebase, Azure

Concepts & Methodologies: OOP, Agile/Scrum, DSA, Machine Learning, UI/UX, Role-Based Access Control

Projects

Plantation Task Management System ([View Project](#)) 2025 - 2026

Technologies: React.js, Express.js, Node.js, MySQL, JWT, RESTful APIs, Azure VM

- Architected and developed a role-based full-stack plantation management platform supporting Admin, Supervisor, and Worker workflows.
- Engineered secure RESTful APIs with JWT, HTTP-only cookies, and Role-Based Access Control.
- Designed and optimized relational MySQL database schemas for workforce, task scheduling, attendance, harvests, incidents, and reporting modules.
- Built an automated smart scheduling and workforce monitoring system, featuring real-time dashboards for task tracking, attendance management, worker performance analysis, and operational insights.
- Deployed and managed the production application on a Microsoft Azure Ubuntu VM using PM2, systemd services, and Linux server configurations.

QuizHub - Distributed Quiz System ([View Project](#)) Jan 2026

Technologies: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, RESTful APIs

- Implemented a distributed backend architecture with a custom API Gateway supporting service registry and round-robin load balancing across multiple Express.js server instances.

- Engineered secure JWT-based authentication with bcrypt password hashing and role-based authorization for Teacher, Student, and Admin workflows.
- Built scalable stateless backend services and integrated MongoDB Atlas with Mongoose for centralized and reliable cloud-based data management.
- Developed real-time quiz workflows including quiz creation, participation tracking, automated scoring, leaderboard generation, and live result updates.
- Designed responsive single-page frontend interfaces using React.js, Tailwind CSS, React Router, and Axios for seamless cross-device user experience.

HerLife - Breast Cancer Awareness Mobile Application

Aug 2025 - Oct 2025

Technologies: Flutter, Firebase, Google Gemini API, Google Maps API

- Engineered a cross-platform Flutter app with self-check tutorials, reminders, and doctor connections.
- Integrated Firebase for backend services and Google Maps API for a location-based clinic finder
- Developed an AI-powered chatbot using Google Gemini API to provide real-time guidance and educational content with multi-language support.
- Awarded Winner at SDG Sprints Hackathon and 2nd Runners-Up at Code with WIE Hackathon.

Point of Sales System - Full-Stack Web Application ([Frontend](#) | [Backend](#))

Dec 2023

Technologies: Java, Spring Boot, React.js, MySQL, Spring Security, JWT, Bootstrap

- Engineered a layered Spring Boot backend architecture with Spring Data JPA, Hibernate ORM, and MySQL for inventory, sales, and customer management.
- Secured RESTful APIs with Spring Security and stateless JWT authentication, implementing custom authentication filters, exception handling, and BCrypt password hashing.
- Developed POS workflows including inventory tracking, stock management, order processing, tax calculation, and CRUD-based business operations with validation handling.
- Built a React single-page frontend with protected routes, Axios-based API integration, and responsive dashboard interfaces using Bootstrap and SCSS.

Certifications

Master Data Science, Machine Learning, Deep Learning, NLP & Generative AI (*In Progress*)

- Covers Data Science, Machine Learning, Deep Learning, Natural Language Processing, Generative AI, Statistics, Mathematics, and End-to-End Industry Projects.

SQL (Advanced) | HackerRank ([View Credential](#))

Networking Basics - Cisco Networking Academy

Achievements

Winner - SDG Sprints - IEEE Sri Lanka Section SIGHT

2nd Runner-Up - Code with WIE 2025 - IEEE WIE Sri Lanka Section

Finalist - SLT Mobitel Codeblast 2.0

Finalist - Hack Like a Girl 3.0 - SLASSCOM

Top 10 Finalist - Junior Hack 7.0 - University of Kelaniya

Volunteering

Member of Industrial Management Science Student Association, University of Kelaniya (2024 - Present)

Student Volunteer, IEEE Student Branch University of Kelaniya (2025 - Present)
