PROFILE SUMMARY

Motivated IT undergraduate at the University of Kelaniya with a strong interest in full-stack software engineering and AI-driven applications. Experienced in developing scalable web and mobile applications using technologies such as React, Node.js, Spring Boot, Flutter, and modern databases. Skilled in RESTful API development, secure authentication, and cloud-based services. Proven ability to build real-world solutions through multiple full-stack and AI-powered projects, with recognition in national hackathons. Passionate about writing clean, maintainable code and continuously learning new technologies.

EDUCATION

BSc (Hons) in Information Technology

2024 - Present

- University of Kelaniya

Comprehensive Master Java Developer Diploma

2023 - 2024

- IJSE-Institute of Software Engineering

G.C.E. Advanced Level - Physical Science Stream (2022)

2020 - 2022

- H/Ruhunu Vijayaba College

PROJECTS

Plantation Task Management System (Ongoing)

React.js | Express.js | Node.js | MySQL | JWT

- Developing a centralized web platform to manage plantation operations including task scheduling, workforce allocation, and harvest tracking across multiple crop fields.
- Designing and implementing RESTful APIs using Node.js and Express, with JWT-based authentication and role-based access control for secure system access.
- Designing and optimizing the MySQL database schema to support efficient data management, reporting, and operational monitoring.
- Performing API testing, debugging, and integration using Postman, while following clean coding practices and Agile development workflows.

QuizHub - Distributed Quiz System ([Group Project](#))

React.js | Tailwind CSS | Node.js | Express.js | JWT | MongoDB

- Developed a distributed quiz platform allowing teachers to create and manage quizzes while students join and participate in real-time, with secure JWT authentication.
- Designed and developed RESTful APIs using Node.js and Express, implemented JWT-based authentication, and ensured scalable and efficient backend architecture with MongoDB.
- Implemented teacher & student modules, real-time result updates, and a responsive React/Tailwind UI for smooth multi-user interaction.

Point of Sales System - Full-Stack Web Application

Java | Spring Boot | React | MySQL

([Project Frontend](#) | [Project Backend](#))

- Built a full-stack web application to manage sales, inventory, and customers, using Spring Boot APIs, MySQL database, and a responsive React frontend.
- Implemented real-time inventory tracking, sales processing, and customer management with CRUD operations, validation, and dynamic dashboards.

HerLife - Breast Cancer Awareness Mobile Application *Flutter | Firebase | Google Gemini API | Google Maps API*

- Built a cross-platform mobile app with step-by-step self-check tutorials, reminders, doctor connections, location-based clinic finder and support in multiple languages to raise breast cancer awareness in Sri Lanka.
- Created educational content, survivor stories, push notifications and a chatbot to keep users engaged and support awareness programs.
- Awarded Winner at SDG Sprints Hackathon and 2nd Runners-Up at Code with WIE Hackathon.

SafeStep - Personal Safety Mobile Application *Flutter | Firebase | MSpace API | Google Maps API*

[\(View Project\)](#)

- Developed a cross-platform personal safety app with SOS alerts, live/offline location sharing, unsafe area notifications and a fake call feature.
- Integrated AI-based motion and route detection with chatbot support and family alert features.
- Built a secure, privacy-focused backend with real-time notifications using Mobitel mSpace APIs.

Cakely - Cake Ordering Website *React.js | MongoDB | Express | Node.js | JWT | CSS/Bootstrap | Swagger*

[\(Project Frontend\)](#) | [Project Backend](#)

- Built a full-stack e-commerce website using the MERN stack with login, product browsing, and cart.
- Developed secure authentication using JWT and password hashing.
- Deployed frontend on Vercel, making the website accessible online with a responsive and user-friendly interface.

Food Delivery Web Application [\(Project\)](#) *React JS | Vite | JavaScript | CSS*

- Built a web app for food ordering and order tracking.
- Designed responsive user interface for smooth user experience.

Car Rental System [\(Project\)](#) *Java Swing | MySQL | NetBeans*

- Developed a desktop app for vehicle rental and customer management using layered architecture.
- Integrated MySQL database for storing rental and vehicle records.

Grain Store Management System [\(Group Project\)](#) *Java Swing | MySQL | NetBeans*

- Developed a Java-based application for grain storage, inventory tracking, and buyer management.
- Connected application with database to handle stock updates and transactions.

TECHNICAL SKILLS

Programming Languages : Java, Python, Javascript/Typescript, Dart, C++, Go, SQL

Frontend : Flutter, React, Next.js, Tailwind CSS, HTML, CSS

Backend : Java (Spring boot), Node.js, Express.js, Rest API

Databases : Firebase, MySQL, postgresSQL, MongoDB

Cloud and Tools : Git/Github, Postman, Figma, VS Code, n8n, Vercel, Firebase Cloud, Azure (basic)

Concepts : OOP, Agile/Scrum, DSA, ML, UI/UX

CERTIFICATIONS

Data Science, Machine Learning, DL, NLP Bootcamp Certificate Course (Ongoing)

Comprehensive Master Java Developer Certificate - IJSE-Institute of Software Engineering ([View Certificate](#))

ACHIEVEMENTS

Winner - SDG Sprints - IEEE Sri Lanka Section SIGHT

2nd Runners Up - Code with WIE 2025 - IEEE WIE Sri Lanka Section

Finalists - SLT Mobitel Codeblast 2.0

Top 10 Selected - KelaniXtreme - IEEE Student Branch University of Kelaniya

Top 10 Finalists - Junior Hack 7.0 - Software Engineering Students' Association in University of Kelaniya
